

## Delta Clean Plus Concentrated

**Bardahl Delta Clean Plus** is a super concentrated, multifunctional and biodegradable cleaner. This product is free of phosphates, non-flammable, easy to use and, moreover, economical. This product has hundreds of applications in the automotive, transport, fleet, industry and shipping sectors. In addition, it is also very suitable for hospitals, schools, restaurants, nursing homes, hotels, and shopping centers.

**Bardahl Delta Clean Plus** is a combination of a high-pressure cleaner, degreaser and street dirt cleaner. It penetrates deep into the dirt layer, soaks it loose, allows it to dissolve and spread. It is mainly used for the cleaning of oil, grease, mildew and other types of contaminants from all kinds of hard surfaces. It has a very powerful cleaning effect that is also acceptable for the environment.

### Advantages

---

- Easy to use: No special tools needed. Cleans decks, hulls and holds of ships. Removes mildew, mold and rotten residues. Dissolves oil, grease, fuel, chemicals Sludge in clean up effectively.
- Economical: Highly concentrated. Provides significant savings if diluted as directed.
- Phosphate-free: does not contain bio-stimulating phosphates that can pollute surface water.
- Non-flammable: safer than hydrocarbon solvent-based cleaners. Does not burn.
- Biodegradable according to European directives, contains no solvents, no phosphates, or silicates. Is broken down by bacteria when it enters the water.
- Preservative Remover: as a Manual Co-Polymer Remover.
- Drain: Rinse with water.
- Shelf life: Effect does not decrease.
- Safe to use on paint and plastic, stripping and car advertising. Does not dull surfaces: total safe cleaning effect, even after repeated use.
- Effect on the wax: Cleans paintwork and keeps it shiny and reflective.
- Versatility: hot or cold to use.

### Applications

---

Cleans engines and engine parts, chains, forklifts, workshop floors, industrial and institutional floors, toilets, counters, linoleum floors, concrete, signs, office furniture, machinery, parts and equipment in the packaging industry, covers, machine parts, gutters and decks, hulls and holds of ships, etc.

### Manual

---

**Bardahl Delta Clean Plus** can be used in a high-pressure cleaner, hot or cold or as a pre-cleaner.

- **High pressure cleaner**

Dilute the concentrate before putting it in the tank. In cold water: up to 1:3. Hot water up to 1:6.

Note: The dilution levels can be influenced by the hardness of the water and the degree of contamination to be treated. The supply of the detergent must be adjusted in such a way that just enough product is used that is needed. Do not use excessively high concentrations. The final dilution should be between 1:60 (cold) to 1:400 (hot).

## Pre-cleaner

---

For heavy degreasing applications, dilute the concentrate to 1:12. For street litters up to 1:20. As Co-Polymer Remover 1:1.

### NB:

Do not allow the detergent to dry. This can cause stains. The cleaned surface must be rinsed with plenty of water. In very hot weather, it is recommended to spray the surface with cold water first.

## Aluminium cleaning

---

When cleaning aluminum, it must first be determined what kind of contamination it is and how the aluminum is finished. Anodized aluminum is very sensitive to acids and alkalis and should therefore be treated with care.

**Bardahl Delta Clean Plus** can be diluted with 4 to 5 parts of water and remain on the surface for 2 to 5 minutes before rinsing.

Care must be taken to ensure that the surface does not dry up. It must also be ensured that when hot/hot cleaning is carried out, the working time must be shortened.

When in doubt, it is advisable to first do a test on an inconspicuous spot of the part to be cleaned.

When mechanical aids such as rotating brushes are used, the dilution **Bardahl Delta Clean Plus** must be significantly increased to 300 to 400 parts of water. Always rinse well afterwards to prevent staining.

mixing ratios	Deltaclean	Water
general cleanings;cold	1ltr	3ltr
general cleanings;hot	1ltr	6ltr
pre-cleaning &degreasing	1ltr	12ltr
street dirt cleaning	1ltr	10-20ltr
