

Body-Sealer (ironing kit)

Bardahl Body-Sealer is a brushable seam seal on an innovative polymer basis for the automotive industry, body shops and bodyshops. The product is very suitable to mimic original factory structure.

Manual

The product can be applied effortlessly and drip-free with a firm brush.

Advantages

- Without applying equipment quickly and drip-free.
- Dries quickly and is quickly refinishable.
- Provides original factory structure with visible brush marks.
- Can be applied both in narrow caterpillar shape and wide layer.
- Can be applied both horizontally and vertically without any problems.
- Does not pull wires during brushing.
- Excellent adhesion, also on clear degreased steel.
- Is resistant to water and mineral oil
- Permanent elastic seal

Application

Bardahl Body Sealer is used to seal seams of bodies, such as metal overlaps, welding and seams, in engine and trunks, in doors and for various seam seals in:

- Automotive industry
- Bodywork factories
- Damage repair companies
- Shipbuilding
- Metal goods industry
- Air ducts
