

Radiator Stop Leak TRUCKLINE

Bardahl Radiator Stop Leak stops and prevents leakage from the circuit of the cooling system. This stop leak is harmless to hoses, joints, and metals.

Bardahl Radiator Stop Leak is resistant to high temperatures, pressures, and vibrations. It does not clog circuits, which results in perfect coolant circulation. Miscible with all commonly used refrigerants and antifreeze agents.

Manual:

- Pour the product into the cooling system.
- If necessary, add coolant.
- Let the engine run for 5 to 10 minutes until the leaks are closed.
- 1 liter treats a cooling system from 40 to 50 liters
